

LEASHANIYA KRISHNAPILLAI

DATA ENGINEER

• Colombo, Sri Lanka • +94779346476 • leashakrish2002@gmail.com • [LinkedIn](#) • [Portfolio](#) • [Github](#)

SUMMARY

Data Engineer with hands on experience designing and building scalable ETL/ELT pipelines, Lakehouse architectures, and cloud based analytics solutions using Microsoft Fabric, Azure Data Factory, and Azure Synapse. Proficient in SQL, Python, and PySpark, with experience in data integration, Bronze to Gold transformations, data quality validation, semantic modeling, and workflow automation. Passionate about transforming complex data into trusted, business ready insights through modern data engineering practices.

WORK EXPERIENCE

Undergraduate Trainee – Data Engineering - IFS

Feb 2025 - Present

- Consolidated SAP and business data from multiple Microsoft Fabric workspaces into a centralized Lakehouse, enabling enterprise wide semantic modeling, reporting, and analytics.
- Designed and optimized scalable Bronze to Gold data pipelines in Microsoft Fabric using PySpark notebooks and Medallion Architecture principles, implementing data quality controls, business logic, and standardized data models to support high volume data processing and deliver analytics ready datasets.
- Developed and maintained Power BI semantic models, DAX measures, and KPI frameworks, enabling trusted reporting and data driven decision making across internal business functions.
- Designed and implemented a Microsoft Fabric based data reconciliation solution to compare DnB and THOR customer data, applying matching logic, data standardization, enrichment, and validation rules to improve data accuracy and consistency.
- Redesigned enterprise sales pipeline workflows by implementing owner based notification mechanisms, replacing group level alerts with targeted notifications to improve accountability, visibility, and operational efficiency.

PROJECTS

Customer Analytics Platform - Microsoft Fabric

Built an end to end customer analytics platform on Microsoft Fabric using the Medallion architecture, with metadata driven ingestion, layered Bronze-Silver-Gold transformations, and full pipeline orchestration. Delivered a Gold layer Customer 360 dataset with a semantic model for reporting.

Data Warehousing and Business Intelligence Solution

Designed and implemented a complete BI solution using a custom football OLTP dataset. Developed a dimensional data warehouse in SQL Server, built ETL pipelines with SSIS, created an SSAS cube with hierarchies and delivered interactive analytics in Excel and Power BI, featuring drill downs, drill throughs, slicing, dicing, and cascading filters.

Airbnb End-to-End Data Engineering Pipeline

Designed a cloud native ELT pipeline ingesting Airbnb data into AWS S3, staged and loaded into Snowflake, with dbt managed transformations across staging, intermediate, and mart layers. Applied dimensional modeling and dbt tests to ensure data quality for downstream reporting.

Automated E-Commerce ETL Pipeline with Apache Airflow

Orchestrated an automated ETL pipeline using Apache Airflow DAGs to extract, transform, and load e-commerce order and delivery data, with task scheduling and dependency management.

Multi Agent Exam Paper Generation System

Built a multi agent AI pipeline with specialized agents for blueprint analysis, content retrieval, question writing, and quality validation, generating curriculum aligned model exam papers with semantically grounded short notes using RAG (FAISS and sentence transformers). Delivered full stack with FastAPI, React, and MongoDB.

AI Powered IT Helpdesk Agent - Microsoft Copilot Studio & Power Automate

Designed a no code IT support agent using Copilot Studio, grounded on internal IT policy documentation to answer employee queries. Integrated Power Automate workflows to automate ticket creation and routing, streamlining internal support requests.

EDUCATION

BSc (Hons) in Information Technology Specializing in Data Science

2022 July- 2026 July

Sri Lanka Institute of Information Technology (SLIIT)

- CGPA- 3.3

Advanced Level Examination

2022 Feb

- Mathematics Stream
- IT-B, Mathematics-C, Physics-C

SKILLS

- **Technical Skills:** Microsoft Fabric, Azure Synapse, Azure Data Factory, Dataflows, Lakehouse architecture, Delta Tables, Data Modeling, Snowflake, ETL/ELT Pipelines, Python, Java, SQL, Power BI, DAX, Semantic Models, Kafka, SSIS, SSAS, Airflow, PySpark, dbt, AWS S3, Git, Agile, Microsoft Copilot Studio, Power Automate
- **Soft Skills:** Communication, Analytical Thinking, Adaptability, Teamwork, Time Management, Problem Solving, Attention to Detail

AWARDS

- **Dean's list 2022**

Recognized for outstanding academic achievement for the year 2022.

- **Colors Award 2023 -Track and field**

Awarded Colors for loyalty and performance in track and field for the year 2023

CERTIFICATIONS

- Python 3 Fundamentals - Issued by Pluralsight
- Reading, Writing and Parsing JSON Files in Python -Issued by Pluralsight
- Python Data Essentials: Data Structures -Issued by Pluralsight
- Introduction to Large Language Models -Issued by Coursera
- Python for Data Science, AI & Development -Issued by Coursera

EXTRACURRICULAR ACTIVITIES

SLIIT involvement

- Member of the athletics team
- VD Manager (IGV) of the AIESEC club
- Member of the Badminton team
- Treasurer of the Gavel Club
- Vice president of Women in FOSS

High School Involvement

- Games Captain (2020) and School Prefect
- President of the Badminton Club
- President of the English Union
- Committee member of the Girl Guides Association
